

What the heck is \$BALLS??

The **\$BALLS** community is on a new path. Originally a Cronos meme token, **\$BALLS** is now focused on bringing the catchy and funny **\$BALLS** meme to new chains where **HYPE** and excitement exist. We're always hunting for exciting new ways to win in the crypto space. Our goal is simple - **FOLLOW THE HYPE**, have fun and make money together as a community. That's all **\$BALLS** has ever been about.

Crypto is driven by **HYPE**, and we recognize this as an opportunity. By following the **HYPE**, we believe we can bring value and profit to our community, while having a lot of fun in the process. If it's new and exciting, you can expect **\$BALLS** to be there bringing that **HYPE**!

Why HODL your Cronos \$BALLS?

As we launch new **\$BALLS** led projects, OG Cronos **\$BALLS** holders will always benefit through a profit share. Think of your Cronos **\$BALLS** holdings like shares in a company. When a new **\$BALLS** project reaches success, Cronos **\$BALLS** holders will always receive a generous dividend of the new token or projects revenue.

We also offer the **Founders Share Club**: Cronos **\$BALLS** holders also receive 10% of any of our founder's crypto plays netting 1K USD in profits or more. **Every time BeannationDeFi wins, our community wins.**

We are always looking for new ways to bring the **HYPE** and reward Cronos **\$BALLS** holders.

This is the utility for Cronos **\$BALLS**. HODL - and get paid.

How can you participate?

Our community is for both the active and passive investors.

Passive Investors can hold Cronos **\$BALLS** and benefit from the drops mentioned above - do nothing and get paid when we win.

Active Investors can participate in our new plays, investing and promoting on socials, potentially benefitting financially from the specific project's success directly, as well as from the Cronos **\$BALLS** dividends they earn for HODLing.

One can also participate in our Discord community where we regularly run contests, airdrops and raffles in **\$BALLS** and other popular tokens.

Staking - Whenever possible, our projects will offer staking rewards to our holders - another way we bring real value to our holders. Our vaults will always be sustainable for the project, so one can expect more balanced APRs from our vaults.

Partnerships - We are always seeking partnerships with other projects where we can bring value, engagement, promotion and hype to our community. Cronos **\$BALLS** is regularly used in multiple Discords as the main raffle/airdrop token, which we have partially funded as part of those partnerships. Right now, we're working on a partnership to use **\$BALLS** in another project's game-fi experience launching Spring 2025. The **\$BALLS** team is always hunting for new partnerships for our community.

What does the future hold?

We don't believe in making promises to do things that could or may happen. This is why we won't release a roadmap and why we don't tease our projects early. We tried a roadmap once, and 3 months after we launched it the market shifted and our plans were pointless in that moment.

Instead, we commit to following the hype, bringing the right products and opportunities at the right time, and in the right market conditions. This requires agility, adaptability and speed, and we're built for that at **\$BALLS**. We will move fast to take advantage of hype where it exists, striving to bring value to this community every single time. We won't always succeed, but we'll never give up.

How do I stay up to date on \$BALLS?

Discord - Our primary home is Discord and the Oh **\$BALLS** server. The Announcements channel is the first place we make any important announcement or early alpha that we have to share. <https://discord.gg/4YvK2bMQdk>

X - Our primary account is **@HODLBALLS** and the second place we drop announcements and alpha. Follow **@HODLBALLS**, and our founder **@defibeannation** for the most up to date info on your **\$BALLS**. Also follow our team of ambassadors, as they're often given funds from the **\$BALLS** treasury for giveaways and promotions. At times we may create new accounts for certain projects, **\$CHODE** is a perfect example of this. You can find these in the social tab of our discord server. <https://x.com/hodlballs>
<https://x.com/cronoschode>

Monthly Update - Starting with the release of this paper we will release a one page update on everything we're working on once per month, shared across all our channels.

Podcast - The Ticker is \$BALLS: Launching soon, this regular podcast/space will highlight real people and their strategies and interests across the crypto and web3 space. We will also talk about our **\$BALLS**, because how could we not??

We hope to expand to Telegram and other social platforms when our team grows.
